### DETAILED ACTION

1. Claims 1-135 are presented for examination.

#### *Election/Restrictions*

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-24, 51-73 and 101-117 are drawn to “an entity of a first computing environment accessing an entity of a second computing environment through a proxy service”, classified in class “709”, subclass “316”.
  - II. Claims 25-37, 74-86, 118-126 are drawn to “an entity of a second computing environment accessing an entity of a first computing environment through a proxy service”, classified in class “709”, subclass “315”.
  - III. Claims 38-50, 87-99, 127-135 are drawn to “an agent process that generates one or more advertisements”, classified in class “709”, subclass “317”.
3. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as lacking “an entity of a second computing environment accessing an entity of a first computing environment through a proxy service” and “an agent process that generates one or more advertisements”, particulars. Invention II has separate utility such as lacking “an agent process that generates one or more advertisements”, particulars. See MPEP 806.05(d).

Art Unit: 2126

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the extensive search required for one group is not required for the other groups, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
